We are proud to announce the 4th annual Disabled Sports USA Far West “**Ability Challenge**” being held on March 19, 2010, at Alpine Meadows Resort located near beautiful Lake Tahoe. We are looking for companies, groups of friends or clubs to enter a four person team into this exciting event.

The Ability Challenge, which honors Wounded Warriors disabled in the wars in Iraq and Afghanistan highlights the capabilities of people with disabilities while raising funds to support our life-changing programs. This year’s event will include a team ski race with relay style gates and timing on a head-to-head giant slalom course, an exciting poker run, and an après ski party. Each team will be joined by a disabled skier, provided by Disabled Sports, offering a close-up view of the remarkable skills possessed by our Disabled Sports participants.

Our Ability Challenge offers an opportunity for team building that is beneficial on many fronts. It allows a company, individual, or organization to make a tax-deductible donation benefiting our programs, while enabling the members of the team to have first-hand interaction with our hosted Wounded Warriors and other disabled skiers, and of course the thrill of racing together.

Since 1967, the goal of Disabled Sports has been to provide individuals with disabilities the tools to achieve success through adaptive recreational activities. In addition to our world renowned snowsports program we also offer instruction in water skiing, cycling and golf. Our programs serve over 1,000 people with disabilities a year. You may refer to our website www.disabledsports.net for further information.

To enter a team, complete the enclosed form and return it to us by February 15th. Space will be limited to 30 teams so we will accept entries on a first come first served basis.

Thank you for considering our request. The funds raised through this event will go directly into supporting our programs. You can help to make a difference in the lives of people with disabilities.

Sincerely,

Michael Hunter
